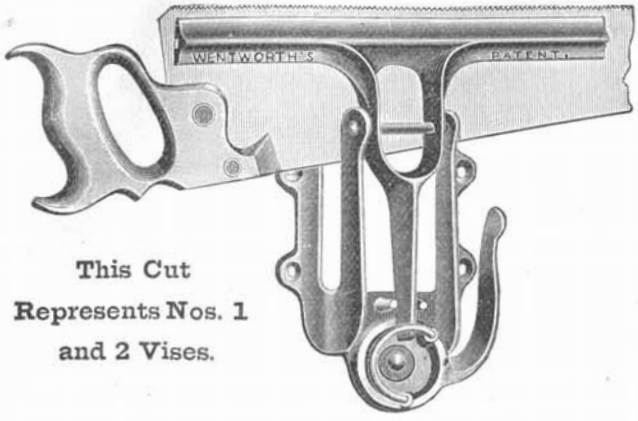
WENTWORTH'S

PATENT NOISELESS SAW VISES.

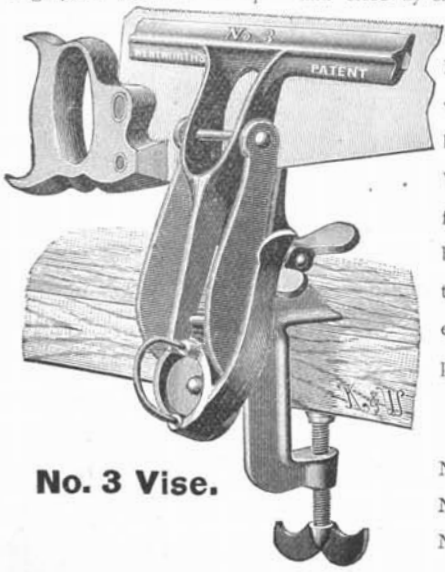


This Cut Represents Nos. 1 and 2 Vises.

The only Vise made with a Flexible Rubber Cushion or Muffler, between the Jaws, which effectually prevents all vibration and renders saw filing noiseless.

We guarantee it to make no more noise than filing on a solid piece of iron.

The Jaws are planed slightly concave, producing an equal bearing the entire length, and are made to open and close by simply turning the Cam Lever. They are strong, well proportioned and handsomely finished. Nos. 1 and 2 vises can be easily screwed to a work bench or any place desired. No. 3 Vice has a Malleable Iron Screw Clamp for attaching it to a work bench, and by turning a Thumb Nut can be tilted to any desired Angle. Also can be easily detached and carried about from place to place.



No. 3 Vise.

PRICES.
